

February 1st, 2024

Dear Exhibitor,

Thank you for considering supporting our upcoming Annual Scientific Meetings (ASM) at the Westin Ottawa from April 27-30, 2024.

Our Scientific Planning Committee is working to develop a comprehensive agenda to gather researchers, physicians, healthcare professionals, and trainees from across Canada that aims to help enhance their professional development and address learning gaps. During our three-day event, we will be integrating topics on the potential therapeutic benefits of medical cannabis to continue building on attendees' understanding and integration of its use in patient care.

The Canadian Pain Society and the Canadian Consortium for the Investigation of Cannabinoids (CCIC) have also partnered to hold a satellite meeting on Tuesday April 30th that will focus exclusively on cannabis and cannabinoid research in medical and non-medical contexts. We will be aggressively marketing this event broadly to others to ensure a robust attendance.

Your participation and funding will help elevate the educational content and secure knowledgeable speakers who are experts in their field. Our dedicated ASM page will continue to evolve with information as we inch closer to our event, which can be viewed [here](#).

We look forward to having you join us in Ottawa and connecting with you to determine your interests, whether you would like to be an exhibitor for the entire three days that also sponsor a breakfast and/or lunch, or as a sponsor of our co-organized Annual CCIC Scientific Day that is focused on cannabis and its impact on Canadians.

If you have any additional questions, please email Tiffany Lee at tlee@ccic.net and/or Sylvia Vespa at office@canadianpainsociety.ca.

Thank you once again for your continued support,

Dr. John Pereira
Canadian Pain Society, President

Dr. Hance Clarke
Canadian Consortium for the Investigation of
Cannabinoids, President
Canadian Pain Society, President-Elect
