# helping the people you know

you're part of a larger community. It might be at work, school or your neighbourhood. We're a part of that community too. At JANSSEN-ORTHO, we're devoted to supporting Canada's healthcare system with community initiatives, patient care programs, and innovative medications. And that devotion extends to you too. We call it, "Doing what's right." For you, the people you know, and your community.

it's what we do.

Over the past century  
the face of Canada  
has changed.

So have we.

Since our company was founded in Canada nearly a century ago, the face of our country has changed – and so have the health needs of Canadians. But one thing has not changed – our commitment to providing essential, innovative medicines and vaccines that help people improve their health and the quality of their lives. Because health matters to all Canadians.

### WELCOME RECEPTION A TASTE OF HISTORY RECEPTION AND CASH BAR FOOD STATIONS! ENTERTAINMENT & PERFORMANCES !

Stroll back through time more than 200 years, to when European explorers began the fur trade with coastal First Nations. The sights, sounds and smells of the past can be so vivid that you might - just for a moment - think you're really there. Enjoy food from around the world, re-connect with fellow members and meet new ones! Steps away from the Fairmont Empress Hotel, The Royal BC Museum is a place of discovery. Through unique galleries, the Museum showcases the human and natural history of British Columbia and temporary exhibits from other countries and cultures. Authentic artifacts and specimens are displayed in highly realistic settings, giving visitors the experience of another time and place.

### KEYNOTE SPEAKER

#### THE EMERGING BIOPSYCHOSOCIAL MODEL OF A MALE CHRONIC PELVIC PAIN SYNDROME

**Chair: Brian Calms**, PhD, RPh, Associate Professor & Canada Research Chair, Faculty of Pharmaceutical Sciences, University of British Columbia, Vancouver, British Columbia

**Dean A. Tripp**, PhD, Associate Professor, Departments of Psychology, Anesthesiology and Urology, Queen's University, Kingston, Ontario, 2008 Early Career Award Winner

*Chronic Prostatitis / Chronic Pelvic Pain Syndrome (CP/CPPS) is a prevalent and life-disrupting condition thought to primarily impact men aged 30-50 years. Our NIH-sponsored research team has forged new directions in urological research by examining the determinants of pain, disability, quality of life, and sexual functioning in North American CP/CPPS samples using a biopsychosocial framework. Recently, we have again extended this body of research by examining the epidemiology and impact of such pain associated symptoms in younger North American and African males (16-19 years). These studies and future avenues for research will be reviewed in this address.*
